Bauxite and Alumina to reach USD XXX billion by 2025.

Bauxite and Alumina valued approximately USD XXX billion in 2017 is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2018-2025. Growing demand in various end-user industries such as the automotive sector and rising transportation sector are the major factors which are driving the growth in the Global Bauxite and Alumina Market. However, several issues associated with environmental pollution are expected to hamper the market growth in the future.

The alumina, also called aluminum oxide, is the essential raw material which is needed to produce aluminum. Alumina is a white powder and it is produced when bauxite is refined. To produce one ton of aluminum, approximately two tons of alumina will be required. In the aluminum manufacturing process, bauxite and alumina are consumed primarily. As bauxite and alumina possess different chemical and physical properties; therefore, they find their use in numerous applications. Due to the properties such as lightweight, high-density and corrosion-free features, the aluminum is widely being used to produce lightweight parts of the vehicles in the automotive sector. Thus, the demand for bauxite and alumina is growing globally. Moreover, the rise in the transportation industry like trucks, airplanes, marine, and railcars is anticipated to boost the demand for bauxite and alumina in the near future.
