## Abstracts

Europe Bovine Lactoferrin Market is valued approximately at USD 126.37 million in 2023 and is anticipated to grow with a healthy growth rate of more than 7.39% over the forecast period 2024-2032. Bovine lactoferrin is a glycoprotein found in cow's milk and other mammalian secretions, including human milk. It plays a crucial role in the innate immune system, acting as an antimicrobial agent and an iron-binding protein. Lactoferrin has various biological activities, including antibacterial, antiviral, antifungal, anti-inflammatory, and immunomodulatory properties. Also, In Europe, there was a growing demand for functional foods and nutritional supplements containing substances such as bovine lactoferrin. Consumers were becoming increasingly health-conscious and seeking products that offer additional health benefits which anticipated to create the demand for Bovine Lactoferrin Market.

Continuous research and development activities aimed at understanding the health benefits of bovine lactoferrin and increasing its uses are propelling the market forward. This includes researching into its potential in areas like wound healing, gastrointestinal health, and oral care. Also, Europe has seen a surge in the demand for nutritional supplements, driven by aging population, rising health concerns, and a shift towards preventive healthcare. Bovine lactoferrin is used in various supplements aimed at supporting immune health, infant nutrition, and sports nutrition. However, the high cost of lactoferrin added products are expected to hinder the market growth during the forecast period 2024-2032.

The key countries considered for the Europe Bovine Lactoferrin market study includes UK, Germany, France, Italy, Spain, and Rest of Europe. In 2023, Germany was the largest market in terms of revenue. Bovine lactoferrin is used as an ingredient in functional foods and dietary supplements due to its various health benefits, such as immune support and gut health improvement. With a growing health-conscious population in Germany, the demand for such products is likely to increase. Also, German consumers are becoming more aware of the importance of maintaining a healthy lifestyle, which includes consuming products that offer added health benefits. Bovine lactoferrin's role in supporting immune function and overall health could be driving its adoption in the market.
