## **Abstracts**

Global 2,3-dichloropyridine Market is valued approximately USD 23.95 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.80 % over the forecast period 2021-2027. The 2,3-Dichloropyridine is an organohalide, in which one or more carbon atoms are linked with each other and it is one of the isomers of dichloropyridine. It is produced by direct reaction of pyridine with chlorine. It comes under the group of synthetic organic compounds that are widely used in the pharmaceutical industry. It is a chemical used as an agrochemical intermediate, as well as pharmaceutical intermediate. 2,3-Dichloropyridine is used in the form of reagent for the preparation of substituted 3-(5-membered heterocycle-carboxamido) pyridine derivatives for treatment of autoimmune and inflammatory diseases such as type 1 diabetes, multiple sclerosis (MS), grave's disease and others. Therefore, rising prevalence of autoimmune and inflammatory diseases is growing the market demand for 2,3-dichloropyridine. For instance, according to Centers for Disease Control and Prevention (CDC) report 2020, the number of people diagnosed with type 1 diabetes in 2020 in America reached 1.6 million as compared to 1.25 million in 2017, which is an increase of approximately 30%. Also, according to British Society for Immunology report 2018, year-on-year rate of increasing incidence of four autoimmune conditions are as follows: - Rheumatic diseases such as rheumatoid arthritis - 7.0% increase per year; Neurological disease such as MS – 3.7% increase per year; Endocrinological conditions such as type 1 diabetes – 6.3% increase per year and Coeliac disease – 4-9% increase per year.

The regional analysis of global. Medium-chain triglycerides market is considered for the

key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to increasing prevalence of autoimmune & inflammatory diseases such as Rheumatoid arthritis, osteoarthritis, Type 1 diabetes, Lupus SLE and others. Whereas, Asia-Pacific is also anticipated to exhibit fastest growth rate over the forecast period 2020-2027. Factors driving are growing geriatric population and rising agriculture sector would create profitable growth prospects for the Medium-chain triglycerides market across Asia-Pacific region.
