## Abstracts

Global 3D Bioprinter Market valued approximately USD XX billion in 2017 is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2018-2025. The 3D Bioprinter Market is continuously growing in the global scenario at significant pace. 3D printing, also known as additive manufacturing, has harbored several innovations in diverse areas of medicine, manufacturing, engineering, and education. Bioprinting is the 3D printing of various biocompatible materials, including cells and components, into three dimensional functional living tissues. 3D bioprinting is relatively an emerging domain but has made rapid advances in the last decade. 3D bioprinting processes can be employed by researchers and cell biology experts to develop a wide range of tissues of any designs and size, such as multilayered skin, bones, tracheal splints, cardiac tissue, cartilaginous structure, and vascular grafts. The micro-scale tissue structure produced by 3D printing is widely used in cell study. Surging demand for high-throughput 3D bio printed tissue models for research & drug discovery, surging organ transplants considering both the male and female population and escalating investments in research & development are the substantial driving factors of the market during the forecast period. Moreover, rising need for advanced drug screening tests is the factor which likely to create numerous opportunity in the market during the forecast period. However, increasing cost associated with 3D bioprinter and lack availability of skilled professionals are the factors that limiting the market growth of 3D Bioprinter across the globe.

The regional analysis of Global 3D Bioprinter Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to rising government initiatives and rising demand for organ transplants across the region. Europe is accounted the second largest region in the global 3D bioprinter market across the globe. Further, Asia-Pacific is also anticipated to exhibit higher growth rate / CAGR over the forecast period 2018-2025. The factors attributing the
