Global 5G Base Station Unit Market is valued approximately at USD 10.24 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 50.11% over the forecast period 2019-2026. A 5G base station is a device that connects other wireless devices to central hub that is a wireless receiver. Also, the 5G base station offers improvements in quality in terms of network coverage to offer better user experience. Various sectors such as retail, entertainment, transportation is likely to benefit from innovation in mobile network and communication offering immense opportunities for the growth of the market. The growth of the market is primarily driven by the rise in the number of IoT devices, the surge in demand for content streaming services, and growing adoption of edge computing. For Instance: as per the Safe at Last Inc., a non-profit organization, it is estimated that the total installed base of Internet of Things (IoT) connected devices is anticipated to reach around 75 billion worldwide by 2025, a fivefold increase since 2015 (15.41 billion). Hence, increasing need for High-Speed Internet for Integrating Advanced Technologies is expected to propel the demand for 5G base station unit. However, huge costs incurred in the implementations of base stations and O&M complexities is expected to impede the growth of the market over the forecast period.
