## **Abstracts**

Global Abrasives Market is valued approximately USD 44.98 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 5.91% over the forecast period 2019-2026. Abrasives are materials that are used for several applications such as honing, pressure blasting, polishing, grinding and lapping in various industries such as metal fabrication, electrical, automotive, healthcare and electronics. A variety of products that use abrasive materials are available in the market such as cut-off wheels, sand blasting, pulp tones, ball mills, sandpapers, grinding wheels and others. A wide range of applications in the metal industry creates high demand for abrasives which is responsible for the market growth. The growing metal fabrications industry increases the demand for abrasives. Colossal production of electronic components and growing automotive industry are also fueling the abrasive market. Further, decreasing cost of synthetic diamond is also driving the market forward. Moreover, the high growth potential of the emerging economies is a major factor likely to create lucrative growth opportunity to the market in the upcoming years. As these regions are witnessing rapid urbanization which is leading to increase in number of production facilities in the countries. However, fluctuating costs of raw materials and stringent government regulations are few factors anticipated to hinder the growth of global Abrasives market during the forecast period.

The regional analysis of global Abrasives Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2019-2026. The rapid growth in industries such as machinery, automotive and metal fabrication create lucrative growth opportunities for the Abrasives market across the region. The increase in production and consumption of industrial products in developing economies such as India and China and also the high disposable income in the emerging economies are the factors responsible for the market growth in this region.
