Global Absorbable Heart Stent Market is valued approximately USD XXXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XXXX % over the forecast period 2021-2027. Absorbable Heart Stent is made of a naturally dissolvable material called polylactide which is similar to dissolving stitches. Stents are the type of small expandable tubes, used to raise the arteries of the patient to prevent blockage. These types of stents are called heart stents or cardiac stents. Increasing in prevalence of Coronary Artery Disease (CAD) and Periphery Artery Disease (PAD) are projected to lift the market growth for the absorbable heart stent market. For Instance: as per the American College of Cardiology on 1st Aug 2019, the number of people with peripheral artery disease (PAD) worldwide increased 23.5 percent, from about 164 million in 2000 to 202 million in 2010. Also, rise in awareness regarding advantages associated with absorbable cardiac stent will increase the adoption & demand for Absorbable Heart Stent is likely to increase the market growth during the forecast period. However, high cost associated with absorbable stent impedes the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Absorbable Heart Stent market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the significant region across the world in terms of market share owing to the rising number of patients with chronic diseases and increase in government initiatives in

healthcare reforms. Whereas, Asia-Pacific is also anticipated to exhibit significant growth rate over the forecast period 2021-2027. Factors such as rapid development of healthcare infrastructure and increase in number of patients suffering from chronic diseases would create lucrative growth prospects for the Absorbable Heart Stent market across Asia-Pacific region.
