Global Acrylic Adhesives Market is valued approximately USD 8.84 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.8% over the forecast period 2021-2027. Acrylic adhesive is the synthetic fiber based out of polymer, these adhesives can hold extreme temperature, build strength and peel stresses. They could replace metal fasteners for static and dynamic loads for bonding most plastics, aluminum, steel and oily metal surfaces They have multiple applications such as holding wood, metal glass, and other waterproof items. Increasing construction and packaging industry in spite of pandemic packaging industry is the largest end user industry of acrylic adhesive and strong growth over construction activities are the major driven factor for growth of adhesive market. For instance, according to department for promotion of industry and internal trade, of India In 2018-2019 budget, INR 6,450 crores has been allocated for smart city project against Rs 6,169 crore in 2018-2019 budget ; Indonesian government would be investing USD 450 billion in construction sector. However, stringent environmental regulations over different regions and the impact of Covid19 pandemic might hamper the growth of the market over the forecast period of 2021-2027. Also, growing end-uses of acrylic adhesives and increasing exports from different regions is likely to increase the market growth during the forecast period.
