## **Abstracts**

Global Active Metal Brazed (AMB) Ceramic Substrate Market is valued approximately USD 1.07 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.45% over the forecast period 2021-2027. AMB Ceramic Substrate is a type of soldering in which metal is brazed to ceramic without metallization. Increasing government initiatives in the automotive sector, increasing demand for medium and high voltage systems and increasing demand for home and electronic appliances, are factors contributing to the market growth. For instance: An increasing use of the Ceramic Substrates in these home appliances has ultimately propelled the growth of the same in the forecast period. For instance: according to Statista, the retail sales (by volume) of the household home appliances are projected to go to 543.3 million units, by the year end 2024 and 499.7 million units, in the year 2022, from 471.9 million units, in the year 2017. This is majorly contributed by the air-conditioners, laundry appliances, and refrigeration appliances on whole. However, rising fluctuations in the raw material prices impedes the growth of the market over the forecast period of 2021-2027. Also, Miniaturization of Electronic Devices, increased R&D activities by the private players is likely to increase the growth of the market in the forecasting period.

The regional analysis of global Active Metal Brazed (AMB) Ceramic Substrate market when considering for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World has led to the analysis that Asia Pacific is the significant

region owing to market share, across the world in terms of market share owing to Growing government initiatives Whereas, North America is anticipated to exhibit highest growth rate over the forecast period 2021-2027.
