## **Abstracts**

Global Adiponectin Testing Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Adiponectin Testing is used to determine the levels of adiponectin in blood. Adiponectin is a hormone that is released from fat cells. It has application in diagnosis of metabolic disorders such as Type 2 diabetes. Also, determination of the adiponectin level in plasma can help to estimate the risk of coronary disease. Rising prevalence of metabolic disorders and increasing healthcare awareness among consumers as well as product launches from leading market players are key drivers for growth of Adiponectin Testing Market. For instance, International Diabetes Federation – Globally, around 537 million adults (20-79 years) are living with diabetes and this number is projected to grow to 643 million by 2030 and 783 million by 2045. Furthermore, according to Statista – in 2019, global health spending per person was estimated at USD 1,129, and it is estimated to grow to USD 1,515 by 2050. Moreover, in January 2020, Randox, UK, released an analyte-specific reagent for adiponectin. This new reagent is intended for use in automated clinical chemistry testing. Also, increasing number of research laboratories and diagnostic centres and rising healthcare infrastructure in emerging economies are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, high product cost associated with Adiponectin Testing kits impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Adiponectin Testing Market study include

Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing advancements in healthcare sector and growing prevalence of metabolic disorders. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as rising geriatric population and increasing penetration of leading market players, would create lucrative growth prospects for the Adiponectin Testing market across the Asia Pacific region.
