Abstracts

Global AdTech Market is valued at approximately USD 779.41 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 13.7% over the forecast period 2022-2029. The term 'AdTech' refers to the software and technologies used by publishers, platforms, brands, and agencies to target, deliver, and track their digital advertising campaigns. Platforms for AdTech software assist agencies and brands in buying advertising space. The AdTech industry comprises a variety of demand-side platforms (DSPs), ad exchanges, data management platforms (DMPs), supply-side platforms (SSPs), and other businesses and products. Advertisers can use these tools to target the appropriate audiences for their ads, make the most of their advertising budgets, and assess the success of their campaigns. The market growth is primarily driven by the factors such as the growth of mobile & online video, consumer inclination to online media, coupled with the high usage of smartphones and the internet.

The surge in inclination towards digital advertising is acting as a major driving factor that is leading the market expansion globally. According to Statista, in 2021, the expenditure on digital advertising was estimated to account for USD 521.02 billion, which is projected to rise and is likely to reach USD 876.1 billion by 2026. Thereby, these aforementioned factors are expected to bolster the demand for AdTech in the global market. In addition, the growing investments in R&D to create new and improved AdTech solutions, as well as the rising demand for programmatic advertising is presenting various lucrative opportunities over the forecasting years. However, the presence of ad-blocking software, and increasing concerns regarding the use of personal data in advertising are hampering the market growth over the forecast period of 2022-2029.

The key regions considered for the Global AdTech Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the market in terms of revenue, owing to the growing penetration of digital advertising and increase in the growth of DMPs and marketing analytics platforms. Whereas, Asia Pacific is expected to grow at the highest growth rate over the forecasting period. Factors such as the rising inclination toward video platforms such as Facebook, YouTube, Instagram, and TikTok, as well as the increasing proliferation of internet consumption are burgeoning the market growth in the forecasting years.
