Global Aerospace MRO Market is valued approximately at USD XXX billion in 2018 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2019-2026. Aerospace MRO refers to overhaul, inspection, repair, or modification of an aircraft or its component. The aircrafts are widely utilized for transport and require high quality maintenance and repair for efficient working. OEMs or aerospace Engineering Service Providers (ESPs) are appointed to perform these tasks. These ESPs are closely monitored with the help of Service Level Agreement (SLA), to ensure high-level of proficiency. Further, continuous requirement for refurbishment & maintenance of aircraft for optimum performance and compliance to stringent government regulations has led the adoption of Aerospace MRO across the forecast period. Also, the introduction of efficient lean manufacturing techniques for making aircraft along with the availability of multiple aircraft at varied price range is augmenting the market growth. While, increasing preference of low-cost carriers with wide airline network is providing a positive outlook for the industry growth as with the air traffic increasing due to low cost flights, the utilization of aircrafts increases which further increases the need for maintenance and repair of the aircraft. As per world bank organization, the passengers carried through air across the world amounted to 3.7 billion in 2016 which increased to 3.9 billion in 2017 and further to 4.23 billion in 2018. Further, The International Air Transport Association (IATA) projected through these statistics in air transport that passenger numbers could double to 8.2 billion in 2037. However, higher costs associated with aircraft maintenance, repair, and overhaul operations may limit the market growth. Although, Incorporation of IoT systems, smart sensors, non-destructive inspection technologies, and RFID tagging present an

opportunistic market for Aerospace MRO during the forecast period.

The regional analysis of global Aerospace MRO market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the technological advancements in the region along with the presence of key aircraft manufacturers such as Boeing Company in USA and Bombardier in Canada. Increasing orders from these manufacturers drives the market. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2019-2026. Factors such as increasing population along with increasing spending power has increased the preference of airways among the people leading to a growing Aerospace MRO market. Also, with the growing military modernization programs which involves increased procurement of advanced fighter jets and unmanned air vehicles would create lucrative growth prospects for the Aerospace MRO market across Asia-Pacific region.
