Abstracts

Global Agricultural Coatings Market is valued approximately USD 3.5 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 7.3% over the forecast period 2021-2027. Agricultural coatings refers to the process of covering seeds with low amounts of exogenous materials which is gaining attention as an efficient delivery system for PBM. Sustainable approach to mitigate environmental and health risks, environment-friendly coating systems and increasing investment in Agri-sector has led the adoption of Agricultural Coatings across the forecast period. Rising investment to yield maximum productivity and durability increase the demand for agricultural coating. For instance, as per the IBEF, Government of India allocated 15.34\$ million in FY 2019-20 for soil health card scheme to boost organic farming. However, stringent and time-consuming regulatory policies impede the growth of the market over the forecast period of 2021-2027. Also, with growing investments in emerging markets, the adoption & demand for Agricultural Coatings is likely to increase the market growth during the forecast period.

The global Agricultural Coatings market is considered for the regions Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is a significant region across the world in terms of market share owing to adoption of technological advancement in agricultural farming. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2021-2027. Factors such as rising disposable income and need of high yield of crop create profitable growth prospects for the Agricultural Coatings market across Asia-Pacific region.
