## **Abstracts**

Global Agrochemical Tanks Market is valued at approximately USD 1.2 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.5% over the forecast period 2022-2029. Agrochemical Tanks are containers used to store water, fertilizers, chemicals, and many other liquids used in the agriculture sector. These tanks are manufactured using polymers, steel or concrete. Additionally, the limited availability of water raises the need to store the water and the increasing use of fertilizers and pesticides by farmers is driving the demand for Agrochemical Tanks.

The prevailing limited availability of water is driving the demand for agrochemical tanks to store water for the agriculture sector. India is being home to an abundance of water resources about 97% of the population faces scarcity of water at least once a year. This limited availability and more requirements in the agriculture sector are surged by storing the water in agrochemical tanks. According to Next Move Strategy Consulting, the agrochemicals market is expected to reach around USD 279 Billion in the coming years. In 2021 the market for agrochemicals accounted for approximately USD 217.24 Billion. This growing market for agrochemicals led to an increase in market demand for agrochemical tanks for storage. For instance, the consumption of pesticides in agriculture grew steadily from 1990-2020. Around 57% of the increase in global consumption was recorded since 1990. Moreover, the continuous advancements in the formulation and increasing capital expenditure in water infrastructure. However, the stringent regulations of government in manufacturing Agrochemical Tanks stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Agrochemical Tanks Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia-Pacific dominated the market for agrochemical tanks due to the emerging agriculture business and increasing use of agrochemicals by farmers. The increasing population surges the

demand for food which in turn raises the market for agricultural activities. The growing agrochemical usage in agricultural activities surges their demand and storage requirements. North America is anticipated to be the fastest-growing region. The adoption of advanced agricultural techniques and practices in this region is driving the demand for agrochemical tanks. The initiatives by the government and major market players in water infrastructure development are also boosting the market demand.
