Abstracts

Global Airborne LiDAR Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Airborne LiDAR is a dynamic, polar and active multi-sensor system comprising a navigation unit (GNSS, IMU) for continuous measurement of the sensor platform's position and attitude and the laser scanner itself. Expansion in applications in defense and civil engineering and rise in demand for 3D imaging has led to the adoption of Airborne LiDAR across the forecast period. For Instance: As per the IBEF, India exports engineering goods mostly to the US and Europe, which account for over 60% of the total export. Engineering exports were recorded at US\$ 75.90 billion in April (FY20) and reached US\$ 60.25 billion in January (FY21). The Index of Industrial Production (IIP) for the electrical equipment industry stood at 92.0 in FY21. Also, with the increasing demand from forestry and agriculture, the adoption & demand for Airborne LiDAR is likely to increase the market growth during the forecast period. However, regulations by FAA (Federal Aviation Administration) impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Airborne Lidar Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the rise in surveying and mapping activities. Whereas, Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as increase in surveying and mapping operations due to the rising infrastructural development are responsible for lucrative growth prospects for the Airborne LiDAR market across Asia Pacific region .
