Global Airborne Warning and Control System Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Airborne Warning & Control System (AW&C), is a system of systems for detecting & tracking of enemy, hostile aircrafts, UAVs etc. It also enables operators onboard and on ground to identify, assess the threat. Growing defense spending and rising research & development in defense technology are key drivers for the growth of Airborne Warning and Control System market. For instance, according to SIPRI- in 2020 US military expenditure reached an estimated USD 778 billion, an increase of 4.4 per cent over 2019 and China's military expenditure, the second highest in the world, is estimated to have totaled USD 252 billion in 2020. This represents an increase of 1.9 % from the year 2019 and 76 per cent over the decade 2011–20. Also, according to The Commonwealth Scientific and Industrial Research Organization -in December 2021, Boeing and CSIRO, Australia's national science agency, have launched a new five-year, USD 41 million research program with focus areas that include improving aviation sustainability, digital twin and model-based engineering, space and using technologies to boost factory safety and productivity. Also, with the increasing focus over security concern, the adoption & demand for Airborne Warning and Control System is likely to increase the market growth during the forecast period. However, high development costs & supply chain disruption owing to covid 19 pandemic impedes the growth of the market over the forecast period of

2022-2028.
