Abstracts

Global aircraft braking system market is valued approximately at \$10.5 billion in 2020 and is anticipated to grow with a healthy growth rate of about 3.6% over the forecast period 2021-2027. Aircraft braking system refers to the combination of aircraft disc brakes used to provide brake to the aircraft wheels while landing on the ground. The braking system are used not only to de-accelerate the aircraft during a landing run but also to hold it during engine run-up and sometimes to steer it during the differential braking. The global aircraft braking system market is being driven by increase in operations in the commercial aircraft industry and technological improvement in aircraft braking component. Furthermore, the growth of the unmanned aerial vehicles industry will provide new opportunities for the global aircraft braking system industry. According to Statista, the market value of unmanned aerial vehicle is expected to increase from \$25.59 billion in 2018 to approximately \$70.28 billion by 2029, across the globe. Such growth witnessed in the unmanned aerial vehicle industry would therefore increase the demand and adoption of technologically advanced aircraft braking system which in turn would drive the market. However, manufacturing challenges faced by product manufacturers, may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global aircraft braking system is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the

World. North America has emerged as a significant region across the world in terms of market share due to rapid growth in the adoption of technologically advanced braking system, rise in aircraft supplies and orders, rising demand for commercial aircrafts, presence of majority of the key players operating in the domain such as Parker-Hannifin Corporation, Crane Co., Honeywell International, Inc, etc. Whereas Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to increased passenger movement, investments and funding in defense infrastructures across emerging economies such as China and India.
