Global Aircraft Cabin Lighting Market is valued approximately USD 1.48 Billion in 2018 and is anticipated to grow with a healthy growth rate of more than 6.80% over the forecast period 2019-2026. The Cabins are considered as a pivotal part of an airplane which is responsible to transport passengers. The Aircraft cabin lighting systems are precisely divided into ordinance signs and emergency lightings, reading and dome lights, lavatory lights, wash lighting and specialty lighting. In the present scenario, due to surge in number of passengers which include both domestic and international passengers, the airline operators are constantly improvising & focusing on increasing aircraft efficiency, comfort and luxury comfort for air travelers. Growth in the number of air passengers are increasing the demand for newer aircrafts, contributing towards market growth. For instance, as per the International Civil Aviation Organization, the number of air passengers are estimated to grow 8.2 billion in 2037 as compared to 3.79 billion in 2017. The Aircraft cabin lighting market is primarily driven owing to surging aircraft deliveries in both developed and developing countries, availability of alternatives to existing interior lights and rising demand of lightweight and energy efficient lights in the aviation sector. However, existing backlog of aircraft deliveries is acting as a key restraining factor for the growth and development of aircraft cabin lighting market.

The regional analysis of global Aircraft Cabin Lighting Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the
