Global Aircraft Chemicals Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Aircraft Chemicals are gaining popularity due to recent spike of covid 19 pandemic. Solvent based cleaning chemicals such as acetone, methyl ethyl ketone, toluene, nPB, and trichloroethylene (TCE) etc. are getting more preference due to their efficiency and safe use. Other factors which are growing the aircraft chemical market are rising passenger traffic and increasing number of aircraft fleet sizes. For instance, according to global database Management company Statista- As of 2019 world's aircraft fleet was estimated at 25,900 and as by the year 2039 the world's aircraft fleet is expected to increase to 49,405 aircraft. Furthermore, the Asia Pacific fleet is expected to increase by about 139 percent to 19,150 aircraft in 2040 from 8020 aircraft in the year 2019. Also, with the increasing government spending in development of aviation infrastructure in emerging economies and rising disposable income coupled with growing urbanization, the adoption & demand for Aircraft Chemicals is likely to increase the market growth during the forecast period. However, volatile cost of raw materials and slow penetration due supply chain disruption impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Aircraft Chemicals market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to presence of well-established aviation industry in the region. Whereas, Asia-Pacific is anticipated to

exhibit highest growth rate over the forecast period 2022-2028. Factors such as growing aviation industry in post covid era would create lucrative growth prospects for the Aircraft Chemicals market across Asia-Pacific region.
