Global Aircraft Fuel Tanks Market is valued approximately at USD 895 million in 2019 and is anticipated to grow with a CAGR of more than 1.9% over the forecast period 2020-2027. The aircraft fuel tanks are found in every military and commercial aircrafts. The aircraft fuel tanks are used for storage of aviation fuel. Aircraft fuel tanks market is primarily driven by surging number of aircrafts, advent of new aircraft programs launched by various governments along with rising investments made by governments in defense & military. The surging number of aircrafts is acting as a key driver for the development and growth of Aircraft Fuel tanks market. According to the General Aviation Manufacturers Association (GAMA), there are more than 440000 aircrafts which are operating on both domestic and international routes as of year 2019. These aircrafts precisely include helicopters, civil aircrafts, military jets, and small training aircrafts across the globe. Around 211000 units (48%) of these aircrafts were manufactured in the United States. Moreover, around 2441 aircrafts were manufactured worldwide among which 1746 aircrafts were specifically manufactured in the United States in the year 2018. Similarly, the worldwide production of aircrafts accounted for around 2658 units among which 1771 units were precisely produced within the boundaries of the United States. In addition, the presence of many multinational organizations such as Airbus, Lockheed Martin, Boeing, Northrop Grumman, GE Aviation and United Technologies that are indulged in manufacturing and production of aircrafts & its components is also creating a lucrative opportunity for the demand of Aircraft Fuel tanks market. For instance: In the year 2018, Netherlands based Airbus Corporation which is indulged in manufacturing of commercial aircrafts produced around 800 units of aircrafts among which 626 units of aircrafts belonged to the A320 variant in

the United States. Similarly, in the year 2018, United States based Boeing Corporation which is another multinational aircraft manufacturer delivered around 806 units of commercial aircrafts to the aviation companies operating within and beyond the boundaries of the United States resulting in fueling the demand and adoption of Aircraft Fuel tanks market. Similarly, China is on the escalating mode to overtake the United States as the world's biggest air travel market considering the forthcoming three years, In the current scenario, the country's appetite for aviation continues to grow exponentially. At present, China needs 6,810 new aircraft in the next 20 years, with a total value of USD 1.025 trillion, owing to the rising passenger throughput further augmenting the development and growth of Aircraft Fuel tanks market.

The regional analysis of global Aircraft Fuel tanks market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the surging number of aircrafts along with advent of new aircraft programs. Whereas Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising number of air passengers in both developed & developing countries along with escalating investments made by government in defense& military would create lucrative growth prospects for the Aircraft Fuel tanks market across Asia-Pacific region.
