## Abstracts

Global Airfield Ground Lighting (AGL) Systems Market is valued at approximately at USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Airfield ground lighting (AGL) is built to assist pilots during takeoff or landing. The airfield ground lighting system (AGL) is suitable for individual lighting switching and monitoring. The technology also improves ground movement safety for airplanes in certain airfield locations. In addition, airport infrastructure costs are controlled by power-line-b systems that consistently communicate on various types of transformers via various monitored regulators. Factors such as growing focus on airfield maintenance and safety, the surge in the demand for air travel, upgradation of run-ways, and expansion and modernization of airports are the primary factors propelling the market growth across the globe.

In addition, the rising investment in airport infrastructure is playing a prominent role in bolstering the demand for airfield ground lighting systems during the estimated period. The International Air Transport Association (IATA) provides the lead on numerous initiatives related to the expansion of airports and airspace. The main objective is to improve airports, their infrastructure, airspace, and other areas' effectiveness, functioning, and safety. IATA projects spending between USD 1.2 trillion and USD 1.5 trillion on the construction of international airport infrastructure by the end of 2030. Moreover, rising investment in the development of advanced technology, as well as the growing emphasis on the adoption of sustainable solutions are presenting various lucrative opportunities over the forecast years. However, the higher installation costs are challenging the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Airfield Ground Lighting (AGL) Systems Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominates the regional market with largest market share, owing to the growing investment in technological advancements, as well as the increasing number of key market players across the region. Whereas, the Asia Pacific is expected to grow with the fastest growing CAGR during the forecast period, owing to factors such as the rising focus on airport infrastructure developments in the market space.
