Abstracts

Global Airless Packaging Market is valued approximately USD 4.04 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 5.9 % over the forecast period 2020-2027. Manufacturers and consumers prefer recyclable packaging materials as they have become aware about eco-friendly products. Airless packaging consists of a container with a non-pressurized dispensing method that protects product from air exposure which increases the shelf life of the product. Airless Packaging is significantly used for the transportation and packaging of expensive products. Further, increasing investments in cosmetic industry, retail sector being expanded geographically and rising demand for premium products has led the adoption of Airless Packaging across the forecast period. For Instance: as per the company source, in 2020, Ren Clean Skincare introduced its skincare product in an airless bottle made of recycled plastic. However, high costs of airless packaging and reduction in demand for luxurious goods impedes the growth of the market over the forecast period of 2020-2027. Also, with the increasing demand for premium cosmetics and sustainable packaging, creates the opportunity and thus, the adoption & demand for Airless Packaging is likely to increase.

The regional analysis of global Airless Packaging Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading/significant region across the world in terms of market share owing to the growing awareness about the eco-friendly packaging, rising demand

for premium products and their protection from oxidation. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising disposable income, increase in demand for cosmetic products and rising penetration of organized retail sector would create lucrative growth prospects for the Airless Packaging Market across Asia-Pacific region.
