Abstracts

Global Airport Ground Transportation Market is valued at approximately USD XXXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Airport Ground Transportation refers to transporting goods from the airport to the place of accommodation. Increasing demand for the GPS worldwide and increasing demand for domestic flights and low-cost airlines are factors contributing to the market growth. For instance: according to Business Standard, domestic flights operated were approximately 46% more, that is: 72,000 in Nov 2020 from 49,150 departures that were reported in October 2020. However, lack of skilled Professionals and limited life of the ground handling equipment impedes the growth of the market over the forecast period of 2022-2028. Also, increasing government initiatives and heavy investments by the private players in the market is likely to increase the growth of the market in the forecasting period.

The regional analysis of global Airport Ground Transportation market includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the increasing number of domestic and international flights. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028.
