Abstracts

Global Airport Lighting Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Airport Lighting are used to illuminate airport runway during night or in low visibility conditions. This light helps the pilots to identify take-off, runway and touchdown areas, and other areas and obstacles on the airfield. The increase in aviation industry has led the adoption of Airport Lighting across the forecast period. For instance, as per the IBEF, in 2020, government planned to spend USD 3 billion on non-metro projects over the 5 years (2016–2020) and this will help in modernization and upgradation of airports. The government in India plans to build new airports at Itanagar, Kohima and Gangtok, which will create a lucrative demand for the airport lighting market. Also, with the expansion of airport infrastructure, the adoption & demand for Airport Lighting is likely to increase the market growth during the forecast period. However, rise in the visibility issues due to adverse weather conditions impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Airport Lighting market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to the rise in the focus towards reducing energy consumption and rise in the research and development activities in this region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as rise in the research and development activities and rise in the economic growth would create lucrative
