## **Abstracts**

Global Alcohol Ingredients Market is valued approximately USD 1.80 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 8.13 % over the forecast period 2021-2027. Alcohol ingredients are specialty ingredients that are primarily employed in the fermentation of plant-derived carbohydrate materials utilized in the production of alcoholic drinks as well as a number of culinary applications. Rising alcoholic beverage consumption is one of the major causes driving up demand for alcohol components. Furthermore, expanding young adult demographics and expanding consumer spending power are important drivers driving demand for alcoholic drinks, fueling development in the alcohol components market. The young generation is likely to continue to be the primary customer base of the alcohol sector. The growing number of clubs, bars, and brewers has also considerably boosted the market. For instance, According to WHO, the total per capita alcohol consumption in India is expected to increase to 7.9 liters in 2025 from current 6.6% liters in 2020. Similarly, the figure for United States is 10.3L from 10.1 L, 11.5L to 11.8L for UK and 8.1L from 7.5 for China in period 2020-2025. . However, excessive alcohol intake is harmful to human health, and there is an increasing global awareness of the dangers of alcohol usage which impedes the growth of the market over the forecast period of 2021-2027. Also, rising demand for craft alcoholic products, frequent mergers and acquisitions, joint ventures and partnerships, product innovation, and regional expansions is likely to increase the market growth during the forecast period.
