Abstracts

Global Alfalfa Seed Market is valued at approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2022-2028. Alfalfa, also known as lucerne or *Medicago sativa*, is a plant that is used as feed for livestock. It has a wide variety of contents ranging from vitamins, minerals, and protein compared to other feed sources. Thus, increasing demand for meat and other dairy products and growing livestock population are factors contributing to the market growth. For instance: according to Statista, the global cattle population went up from 996 million, in the year 2021 to 1000 million, in the year 2022. However minimal production of fodder crops and lack of knowledge and expertise in the Alfalfa Seeds Market impede the growth of the market over the forecast period of 2022-2028. Also, strategic initiatives by the private players and increasing awareness towards nutrition levels of alfalfa are likely to increase the growth of the market in the forecasting period.

The regional analysis of the global Alfalfa Seed market includes Asia Pacific, North America, Europe, Latin America and Rest of the World for analysis and estimation. North America is the leading region across the world in terms of market share owing to rising demand for beef, and meat. Whereas, Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Increasing demand for dairy products would create lucrative growth prospects for the Alfalfa Seed market across Asia Pacific region.
