## **Abstracts**

Global Allergy Treatment Market is valued approximately USD 17.44 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 6.48% over the forecast period 2021-2027. Allergy treatment has grown immensely, looking into the fact that a significant portion of the population worldwide is suffering from some type of allergy or the other. It may be food, eye, rhinitis asthma, or skin allergies. Increasing investments from the private players and increasing incidences of various allergies and respiratory problems are factors contributing to the market growth. For instance: in the year 2018, according to Medscape, about 10%-30% adults and 40% of children suffered from allergic rhinitis. However, increasing use of biosimilars and lack of awareness towards Allergy Immunotherapy (AIT) in the patients impedes the growth of the market over the forecast period of 2021-2027. Also, increasing awareness towards health and self-medication and rapid technological advancements is likely to increase the growth of the market in the forecasting period.

The regional analysis of global Allergy Treatment market when considering for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World has led to the analysis that North America is a significant region across the world in terms of market share owing to increasing number of food and rhinitis allergy. Whereas, Asia Pacific is anticipated to exhibit highest growth rate over the forecast period 2021-2027. Factors such as increasing investments would create lucrative growth prospects for the Allergy Treatment market across Asia-Pacific region.
