Global Alternative Fuel and Hybrid Vehicle Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028.

The Alternative Fuel Vehicles can be defined as vehicles that runs on substances other than traditional Gasoline and petrol fuels. Alternate Fuel include electric, solar, biodiesel, ethanol, propane, compressed air, hydrogen, liquid natural gas, and liquid petroleum. Whereas Hybrid Vehicles are type of vehicles that receive power from an internal combustion engine in combination with one or more electric motors that use energy stored in rechargeable batteries. The increasing adoption of clean mobility solutions and rising prices of crude oil worldwide as well as recent investments from leading market players are factors that are accelerating the global market demand. For instance, According to International Energy Agency (IEA) estimates – during 2020, the global electric car stock reached to 10 million units, witnessed an increase of 43% from 2019. Around 3 million new electric cars were registered worldwide in 2020. Europe led the electric car registrations with around 1.4 million new registrations. China followed with 1.2 million registrations and the United States registered 295 000 new electric cars.

Furthermore, leading market players are investing towards production of Hybrid Electric Vehicles. For instance, in April 2022, Aichi, Japan based Toyota Motor Corporation announced investment of USD 383 million in four of its U.S. manufacturing plants. The new investment supports the production of four-cylinder engines, including options for hybrid electric vehicles, at its Alabama, Kentucky, Missouri, and Tennessee plants. Also, growing number of Supportive Government Policies & regulations and rising concern over environmental degradation are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, a high cost associated with Hybrid Vehicles coupled with lack of penetration in developing regions impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Alternative Fuel and Hybrid Vehicle Mmarket study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing adoption of clean mobility solutions and increasing number of investments from leading market players in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the thriving growth of EV industry and favorable government initiatives, would create lucrative growth prospects for the global Alternative Fuel and Hybrid Vehicle Mmarket across the Asia Pacific region.
