Global Altimeter Systems, Pitot Tubes, and Other Sensors Market is valued approximately USD 181.88 Million in 2019 and is anticipated to grow with a healthy growth rate of more than 3.21% over the forecast period 2020-2027. An altimeter or an altitude meter is an instrument used to measure the altitude of an object above a fixed level. A pitot tube, also known as pitot probe, is a flow measurement device used to measure fluid flow velocity. The pitot and altimeter are gaining significant demand from aviation industries, as it enables the efficient measurement of height of an aircraft above a fixed level during landing of commercial and military aircraft. Hence, rapid growth in aviation industry across the globe is escalating the demand altimeter, pitot tubes and other sensors for measurement of height of aircraft over the forecast years. According to the Statista, in 2018, the Aviation market is the largest in Asia pacific region which covers over 34.9% of the global share, followed by North America, Europe and Latin America that accounts for over 24%, 22.2% and 7% of the total share in the globe aviation market. In addition, growing need for high quality avionic instrument is driving the growth of market. However, high cost of installation and maintenance of altimeter and pitot tubes is hampering the market growth.

The regional analysis of global Altimeter Systems, Pitot Tubes, and Other Sensors Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the increase in rate of air traffic. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the

forecast period 2020-2027. Factors such as growing need for high quality avionic instrument would create lucrative growth prospects for the Altimeter Systems, Pitot Tubes, and Other Sensors Market across Asia-Pacific region.
