Global Aluminum Door and Window Market is valued approximately at USD 65.3 Billion in 2019 and is anticipated to grow with a CAGR of approximately 5.1% over the forecast period 2020-2027. Aluminum Door and Window have gained popularity over the years as they are highly durable, require little framework, are easy to clean and ensure high level of security. As per Livingwood Windows Ltd, a UK based company in 2017, aluminum windows and doors can last up to 30 years due to high resistance from the outside elements which decay the metal as compared to other frames. Due to easy cleaning and easier maintenance of the Aluminum doors and windows, it is chosen by many household, commercial buildings and hotels. Since these windows and doors are available in several colors and textures, they are sustainable to modern design choices which accelerates the growth of the market. Aluminum window and door frames are thermal efficient and can attain and lose heat easily up to 60% as per Livingwood Windows Ltd. In 2017, when the aluminum material used in the manufacturing of doors and windows is integrated with thermal break technology, it enhances acceptance of these windows due to high thermal efficiency and durability. Further, rise in industrialization and rapid urbanization in both developed and developing economies have boosted the growth of the market. For Instance: In 2018, as per United Nations 55% of the world's population reside in urban areas which is estimated to increase up to approximately 68% by 2050. Moreover, rise of investments in infrastructural developments and trend for renovation of the old buildings have created opportunities for aluminum door and window market. For Instance: As per UN Sustainable Development Goals in 2017, from 2016-2030, investment of 3.8% of global GDP in

infrastructure development would content the growth rates. However, overall costs of installation and material is higher than nominal window frames which may hinder the growth of Global Aluminum Door and Window Market over the forecast period of 2020-2027.
