Global Ambulatory Surgical Centers Market is valued approximately USD XX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2027. Ambulatory Surgery Centers (ASC) also known as outpatient surgery centers, is a healthcare facility where surgeries are performed on the same day of admission of patients without the need for an overnight stay. These centers offer diagnostic, preventive procedures and surgeries such as gall bladder removal, abdominal hernia repair, skin therapy, small joint repair, and others. The Ambulatory Surgery Centers (ASC) is being highly demanded due to the coronavirus pandemic. These centers can act as unprecedented array of temporary waivers, help hospitals to expand treatment capacity outside their hospital walls in response to the patient surge resulting from the COVID-19 pandemic. The increasing number of Ambulatory Surgical Centers and need to curtail escalating healthcare costs tends to drive the market. Furthermore, growing use of IT solutions in healthcare among ASCs is responsible for growth of the market over the forecast period. For instance: On 17th December 2018, provider of ambulatory-only healthcare technology solutions NextGen Healthcare Inc. Launched NextGen® Health Data Hub™ which NextGen® Health Data Hub™ is a cloud-based Health Information Exchange (HIE) platform that supports the sharing and aggregation of patient health data. However, the heavy infrastructure investments and high cost of deployment are the major factors restraining the growth of global Ambulatory Surgical Centers market during the forecast period.
