## **Abstracts**

Global Analgesics Market is valued at approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Analgesics, also known as painkillers or pain relievers, are drugs that help in relieving pain without affecting consciousness, altering sensory perception, or blocking nerve impulse conduction. Increasing usage of pain relief, pain management and painkillers, growing geriatric population has led to the adoption of Analgesics across the forecast period. For Instance: In 2017, between 950-1000 million people were over the age of 60. However, by 2050, these numbers are expected to reach 2100 million, accounting for around 21% of the total global population. Also, with the rising incidence of cancer worldwide, the adoption & demand for Analgesics is likely to increase the market growth during the forecast period. However, government regulations impede the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Analgesics market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North-America is the leading region across the world in terms of market share owing to rising penetration of generics, coupled with the growing healthcare expenditure in the region. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as growing geriatric population would create lucrative growth prospects for the Analgesics market across Asia-Pacific region.
