Abstracts

Global Anesthesia Monitoring Devices Market is valued at approximately USD 1616 million in 2021 and is anticipated to grow with a healthy growth rate of more than 12 % over the forecast period 2022-2028. Anesthesia is the use of medicines to prevent pain during surgery and other procedures. These medicines are called anesthetics. They may be given by injection, inhalation, topical lotion, spray, eye drops, or skin patch. The growing number of surgeries, rise in the aging population has led to the adoption of Anesthesia Monitoring Devices across the forecast period. For Instance: as per the United Nations in 2019, there were 703 million persons aged 65 years or over in the global population. This number is projected to double to 1.5 billion in 2050. Globally, the share of the population aged 65 years or over increased from 6 per cent in 1990 to 9 per cent in 2019. Also, with the technological advancements, the adoption & demand for Anesthesia Monitoring Devices are likely to increase the market growth during the forecast period. However, high cost of devices impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Anesthesia Monitoring Devices market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the technological changes as well as the growing use of anesthesia monitors in the freestanding surgery centers. Whereas, Asia-Pacific is also anticipated to exhibit the

highest growth rate over the forecast period 2022-2028. Factors such rising clinical importance of monitored administration of anesthesia in care units would create lucrative growth prospects for the Anesthesia Monitoring Devices market across Asia-Pacific region.
