Abstracts

Global Animal Husbandry Market is valued approximately at USD XXX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2026. Animal husbandry is a branch of agriculture concerned with animals that are raised for meat, fiber, milk, eggs, or other products. It includes day-to-day care, selective breeding and the raising of livestock. The rise in demand for meat, chicken, seafood, beef and other animal products are the major factors driving the growth of the Animal Husbandry market. Although, the spread of the COVID-19 pandemic has resulted in the sharp fall in the demand for chicken and meat owing to the various rumors amongst the population regarding the spread of the virus through animal's meat and chicken. However, the Centers for Disease Control & Prevention announced that the virus is known to be transmitted via direct contacts to humans and not via livestock or aqua-animal. As per All-India Meat & Livestock Exporters Association, the country's Buffalo meat exports have witnessed a steep fall with exports falling nearly 50% to around 50,000 tons in the February 2020. Moreover, the buffalo meat industry lost a business of USD 1.96 billion of exports to Vietnam which largely caters to the Chinese Market. The decrease in exports can be seen with the exports of 70 containers of 28 tons each in February 2020 compared to the 240 containers exported in February 2019. This tremendous decrease hits the animal husbandry market negatively impacting the market growth. Moreover, the Poultry industry in Maharashtra, India pegged loss of USD 196 million as the daily sales of Chicken declined from 3000 tons per day to about 2000 tons per day in February 2020. Moreover, the process of Farm gate chicken in the same period declined by more than 50% taking the daily losses of the state to about USD 1.3 million. Hence the decline

sales of meat and chicken negatively impact the animal husbandry market. Furthermore, amidst the pandemic and the shutdown, the animal health and treatment has been a major factor for the animal husbandry industry. As the Union Animal Husbandry, dairying and Fishery Ministry in March 2020 asked the state governments to include veterinary services under the list of essential services. This initiative was taken to provide relief for the animal husbandries regarding cattle health. Thus, amidst the pandemic the animal husbandry has experienced a severe blow and the effects would prevail post pandemic owing to the fears among the population.

The regional analysis of global Animal Husbandry market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world in terms of market share owing to the presence of large animal husbandries in the region along with large animal livestock. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2026. Factors such as rising meat demand would create lucrative growth prospects for the Animal Husbandry market across Asia-Pacific region.
