Abstracts

Global Anthocyanin Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.5% over the forecast period 2022-2028. Anthocyanin is a flavonoid that is a type of vegetable-based pigment that is used as a natural colourant in a range of industries. It has no taste or flavour and is available in a range of colours ranging from red to purple to blue. Anthocyanin is a water-soluble pigment used mostly in the food and beverage industry as a colourant. Anthocyanin is a kind of antioxidant that offers a lot of health advantages. Increased demand for personal care products and increase in the consumption of anthocyanin-rich food products are key drivers of Anthocyanin Market growth. According to Statista, the beauty and personal care industry has been steadily expanding over the world. Global revenue for the industry, which was estimated at 420 billion dollars in 2018, is expected to exceed 716 billion dollars by 2025. Also, Tatcha LLC presents a skincare product “The Dewy Skin Cream” which is rich in anthocyanin. Furthermore, constant spending on research and development activities propel market opportunities in the coming years. However, rise in government regulations regarding anthocyanin usage impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Anthocyanin Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Europe is dominating the market shares owing to the growing preference for naturally derived antioxidants in the region and increase in demand for food and beverage.
