Abstracts

Global Anthracene Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Anthracene is a solid polycyclic aromatic hydrocarbon. It is a component of coal tar. Anthracene is used in the production of the red dye alizarin and other dyes. It is primarily used as an intermediate in the production of dyes, smoke screens, scintillation counter crystals, and in organic semiconductor research. Rising electronics industry and growing demand from other end user industries like insecticide, nuclear reactor, etc. are growing demand for Anthracene. According to Statista in the Consumer Electronics segment, the number of users is expected to amount to 2.725 billion by 2025. User penetration will be 25.3% in 2021 and is expected to hit 34.9% by 2025. Also, growing demand from various end use industries is likely to increase the market growth during the forecast period. However, government restriction due to Anthracene being harmful for human health in consumed with contaminated water impedes the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Anthracene market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to substantial share of the global demand, growing research and development activities related to anthracene applications. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2021-2027. Factors such as growing demand from end-use industries such as textiles and chemicals would create lucrative growth prospects for the Anthracene market across Asia-Pacific region.
