Abstracts

Global Anti-Pollution Ingredients Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Anti-Pollution Ingredients refers to additives or ingredients which are used in production on of anti-pollution cosmetics products. Some of the cosmetics products which uses anti-pollution additives are cleansing oils, active ingredient face washes, facial cleansers, SPF protective ingredients, anti-pollution makeup. Growing cosmetics industry and rising consumer preference towards natural skincare are key drivers for the growth of Anti-Pollution Ingredients market. For instance, according to global database Management company Statista- as of 2020, revenue in global cosmetics industry was estimated at USD 94.2 billion and as per projections by the year 2025 the global revenue would reach to USD 145.2 billion In addition, in 2019, The Solabia group, France based biotechnology company has acquired Algatech, an Israil based company working in the microalgae industry and in November 2020, Lucas Meyer cosmetics, Canada based biotechnology cosmetics has launched new active cosmetics ingredient called Bor?aline, it would be helpful in decreasing the appearance of skin redness by reducing inflammation. Also, with increase in pollution levels globally and rising e-commerce industry in emerging economies, the adoption & demand for Anti-Pollution Ingredients is likely to increase the market growth during the forecast period. However, negative impact of lockdown restrictions on cosmetics industry and slow penetration from rural areas of emerging

economies impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Anti-Pollution Ingredients Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to growing awareness towards skincare and presence of leading market players in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as increasing pollution levels and rising per capita income in the region would create lucrative growth prospects for the Anti-Pollution Ingredients Market across Asia-Pacific region.
