Abstracts

Global Anti-seize Compounds Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Anti-seize compounds are mainly used to protect metal parts from seizing, galling, wear, and corrosion, and to prevent metal-to-metal contact. Owing to their special composition, they are suitable for use under static and boundary conditions. Growing automotive, transportation industry & mining and construction sectors are key drivers for the growth of Anti-seize Compounds market. For instance, according to India Brand Equity Forum (IBEF)- In May 2021, exports of mica, coal & other ores, and minerals, including processed minerals, estimated at USD 0.38 billion an increase of over USD 0.16 billion in comparison with USD 0.22 billion in May 2020.

Also as per IBEF, in August 2019, the government of India has allowed 100 per cent foreign investment in coal mining and contract manufacturing. Also, with the increasing demand from end use industries and growing Construction sector in emerging economies, the adoption & demand for Anti-seize Compounds is likely to increase the market growth during the forecast period. However, strengthen government mandates regarding use of metallic Anti-seize compounds and volatile crude oil prices impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Anti-seize Compounds Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to growing automotive and construction sector in the region. Whereas Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as abundance of raw materials and availability of cheap labour in the region, would create lucrative growth prospects for the Anti-seize Compounds market across Asia-Pacific region.
