Abstracts

Global Aplastic Anemia Market is valued approximately USD XXX million in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2027. Aplastic anemia is a condition that happens when your body stops generating sufficient new blood cells. The condition leaves you tired and more prone to uncontrolled bleeding and infections. Aplastic anemia, a rare and serious condition, may develop at any age. It can happen suddenly, or slowly and worsen over time. It can be either moderate or severe. Medications, blood transfusions or a stem cell transplant, also known as a bone marrow transplant, may be included in aplastic anemia treatment. Rising number of blood disorder cases across the world is the major factor stimulating the demand for aplastic anemia market. For instance, as per Statista, Hemophilia A and B and von Willebrand disease are the most prevalent types of bleeding disorders. There were around 210,454 individuals worldwide who were diagnosed with haemophilia in 2018 and 78,500 who were diagnosed with von Willebrand disease. Also, In 2018, it was estimated that more than 13,600 individuals were diagnosed with haemophilia A in the United States, while about 4,100 were diagnosed with haemophilia B. However, Treatment costs are a major factor influencing the choice of therapy. Bone marrow

transplantation costs are over USD 300,000. Thus, high treatment costs are likely to hamper the growth of the market for aplastic anemia treatment.

The regional analysis of global Aplastic Anemia market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the high prevalence rate of blood disorder. Whereas Asia-Pacific is also anticipated to exhibit highest CAGR over the forecast period 2020-2027. Factors such as increase in awareness about aplastic anemia and blood disorders would create lucrative growth prospects for the Aplastic Anemia market across Asia-Pacific region.
