Global Arachidonic Acid Market is valued approximately at USD 213.65 Million in 2020 and is anticipated to grow with a healthy growth rate of more than 5.8% over the forecast period 2021-2027. Arachidonic acid is the chemical messenger that is initially released by muscles during intense weight training, to control the core physiological response to exercise, regulate the intensity and helps in producing tissue responses to injury. It is largely found in the fatty parts of red meats. It is an essential fatty acid which must be supplied in the diet as it cannot be synthesized in the body. The global Arachidonic Acid market is being driven by increasing health awareness among consumers to maintain strength & fitness. Another important driving factor for the growth of market is the rising outdoor sporting activities and participation in physical activities including sports, marathons, gym sessions, etc. For instance, according to Statista, the number of participants involved in running, jogging & trail running in United States increased from 57.83 million in 2018 to 61.01 million in 2019. Furthermore, the growing prevalence of sports injuries and rise in demand for the product in dietary supplements will provide new opportunities for the global Arachidonic Acid industry. However, high production costs due to lack of skilled workforce and may impede market growth over the forecast period of 2021-2027.

The geographical analysis of the global Arachidonic Acid Market is based on the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World . North America is the leading region across the world in terms of market share due to the presence of large key companies and the awareness among consumers regarding the benefits of supplements which has stimulated product demand in the region. Whereas Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to the shifting consumer inclination towards sports

nutrition & supplements and availability of affordable raw materials in the region.
