Abstracts

Global Architectural Services Market is valued approximately at USD XX billion in 2018 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2019-2026. Architectural service market comprises of companies handling planning, designing and supervising construction related to a wide range of industries. Clients of the architectural service market include businesses and governments, and sometimes private households. Major technological innovations in the market such as use of advanced planning and designing software have contributed towards the growth of the market. The growth of the market is primarily driven by rising demand for configuration administrations and expanding investments in constructions. For Instance: As per the National Bureau of Statistics in 2017, the value-added output of the construction sector in China reached to \$118.63 billion compared with only about \$2.02 billion in 1978. Similarly, according to the Forecon Organization in 2018, the EUROCONSTRUCT reveals that European construction will grow around 2.7% and occurs in all main sectors including non-residential, residential and civil engineering. Such growth witnessed in construction sector is expected to increase the adoption & utility of architectural services as it offers wide variety of services including architectural programming, feasibility studies, and project management. However, highly fragmented

market is expected to impede the growth of the market over the forecast period.

The regional analysis of global Architectural Services market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is expected to hold a notable share in the world in terms of revenue owing to the increasing number of mega construction projects and government investments to promote smart city projects. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period. Factors such as growing disposable incomes and growing need for innovation construction or architectural products would create lucrative growth aspects for the Asia-Pacific region during the forecast period of 2019-2026.
