## **Abstracts**

Global Aromatherapy Market is valued approximately at USD 1.43 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 11.5% over the forecast period 2020-2027. Aromatherapy is all-inclusive healing treatment that involves natural plant extracts to boost health and well-being of individuals. Every so often, aromatherapy well-defined as essential oil therapy. This therapy is primarily utilizing aromatic essential oils medically to improve the health status of the body, mind, and spirit. It often improves both physical and emotional health. In addition, aromatherapy is also considered as an alternate medicinal therapy that aids in recovery from several disorders, such as pain, respiratory disorders, cardiovascular disorders, cold and cough, digestion problems, skin-related problems, immune system dysfunction, insomnia, anxiety, and wounds. Further, it demonstrates proimmune functions when administered to the cancer patient, as they are competent enough to raise the efficacy of frequently used chemotherapy drugs (e.g., paclitaxel and docetaxel). Thus, the high presence of cancer patients in the developed and developing region driving the demand for aromatherapy market. For instance, the International Agency for Research on Cancer (IARC) estimated that incidences and mortality of cancer have been alarming, owing to its rapid population growth and socio-economic development. In 2018, the IARC

estimated that around 18.1 million new cancer cases and 9.6 million cancer deaths were reported across the world. Also, the prevalence of cancer worldwide is anticipated to grow to almost 27.5 million new cancer cases and roughly 16.3 million cancer deaths by 2040. This, in turn, is likely to strengthen the demand for aromatherapy too, globally. However, the lack of R&D to support the use of aromatherapy is one of the major factors impeding the market growth over the forecast period of 2020-2027.

The regional analysis of the global Aromatherapy market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the rising awareness about the benefits of aromatherapy among people, along with the rise in presence of market vendors in the region. Whereas, Asia-Pacific is anticipated to exhibit the highest growth rate / CAGR over the forecast period 2020-2027. Factors such as growing prevalence of diseases, such as cancer and cardiovascular, along with growing popularity of essential oils in Asian countries, such as China and India, are the few factors creating lucrative growth opportunities for the aromatherapy market in the region.
