Abstracts

Global Artificial Humus Market is valued at approximately USD 169.6 million in 2021 and is anticipated to grow with a healthy growth rate of more than 6.5% over the forecast period 2022-2029. Artificial Humus can be defined as dark, organic material that develops in the soil as plant and animal debris decompose. Humus contains a variety of nutrients that are essential for healthy soil. The majority of plants require nitrogen, which is found in humus. Along with the bacteria, fungi, and algae that aid in the soil's ability to fix nitrogen, humin, fulvic acid, and humic acid make up the three main components of artificial humus concentration. Making artificial humus from biowaste, such as green cuttings, leaf litter, or tree bark, is necessary to hasten the natural processes. As a result, a product combination resembling naturally occurring humic compounds is produced, and soils can subsequently use it. The growing demand for organic fertilizers and increasing incidences of soil degradation are key factors driving the market growth.

The increasing need for organic fertilizers due to growing incidences of soil quality degradation is contributing towards the growth of the Global Artificial Humus Market. For instance – according to Statista – in 2020, the global market for organic fertilizers was valued at USD 8.3 billion and as per projections this number would reach USD 15.8 billion by 2026. Also, growing need for bio stimulants and rising adoption of sustainable agricultural practices would create a lucrative growth prospectus for the market over the forecast period. However, the lack of awareness towards Artificial Humus among farmers stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Artificial Humus Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia Pacific dominated the market in terms of revenue, owing to the dominance of leading market players as well as increasing horticulture practices in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising demand for organic fertilizers as well as increasing number of initiatives from government authorities to promote adoption of sustainable agriculture practices in the region.

Major market players included in this report are:

Recent Developments in the Market:

In December 2020, Agritech Startup Humus received funding from Venture Catalysts, 9Unicorns And We Founder's Circle. Moreover, this funding would be used for offering end-to-end solution to simplify the complex logistics processes in the Indian agricultural sector by eliminating the middleman and connecting farmers to retailers.
