Diseases as well as strategic initiatives from leading market players are key factors accelerating the growth of the Market. According to World Health Organization (WHO), the global expenditure on healthcare facilities accounts for over 10% of global GDP i.e., 8.3 trillion USD. Moreover, an NCBI report of 2020, stated that around 68% of covid-19 positive cases were accurately detected by the AI-based algorithms out of 25 patients. Moreover, leading market players are working towards new product announcements to leverage the growing adoption of AI tools in the healthcare industry. For instance, in July 2022, Aster DM Healthcare Group's innovation hub, the Aster Innovation and Research Centre, has partnered with Intel Corporation and AI platform provider CARPL.ai to create and launch an AI-powered health data platform in India. Also, the growing number of geriatric individuals and the rising healthcare sector in emerging markets would create lucrative growth opportunities for the market during the forecast period. However, a lack of organized data availability, and a dearth of skilled professionals market growth throughout the forecast period of 2022-2028.
