Abstracts

Global Artificial Intelligence in Military Market is valued approximately USD 6.3 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 13 % over the forecast period 2021-2027. Artificial intelligence in military is the ability of a digital computer or computer-controlled robot to perform tasks commonly associated with intelligent beings. Artificial intelligence in military is used for enabling autonomous systems to conduct missions, achieving sensor fusion, automating tasks, and making better, quicker decisions than humans. Increased government spending on defence to improve AI capabilities, international conflicts, has led the adoption of artificial intelligence in military across the forecast period. Major international conflicts such as the Syrian Civil War, the Saudi Arabia-Yemen conflict, US-Iran tensions, and India-China tensions led the adoption of artificial intelligence in military. For instance: As per STOCKHOLM INTERNATIONAL PEACE RESEARCH INSTITUTE (SIPRI) Total global military expenditure rose to \$1981 billion last year, an increase of 2.6 per cent in real terms from 2019. However, high manufacturing costs and installation impedes the

growth of the market over the forecast period of 2021-2027. Also, with incorporation of quantum computing in AI, the adoption & demand for Artificial Intelligence in Military is likely to increase .

Global Artificial Intelligence in Military Market is segmented on the basis of geographical region as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the growing defense manufacturing companies and investment in AI research. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2021-2027. Factors such as rising military budget, territorial disputes between the nation would create strong affinity for growth prospects for the Artificial Intelligence in Military market across Asia-Pacific region.
