Abstracts

Global Asphalt Market is valued approximately USD XXX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2027. Asphalt is the refined residue obtained from the refinement process of specific crude oils. It is chiefly used in road construction as an adhesive or binder and is mixed with aggregate particles for generating asphalt concrete. The added main applications of asphalt incorporate production of roofing felt, bituminous waterproofing products and sealing flat roofs among others. The global demand for asphalt is swelling owing to the growth in the construction industry specifically in the emerging economies such as China, India and Brazil. The surging urbanization in both developed and developing countries, escalating construction sector which include both residential and commercial spaces, government investments towards infrastructure development along with escalating construction of provincial and national highways. These activities demand high quantities of Asphalt which would drive the market growth. For Instance: the escalating smart city projects across the world further provide a surge in the construction activities. As per government insider, there are 1000 smart city pilot projects around the world of which China is to home to 500 smart city pilot projects . Further, the country in 2017 invested USD 46.52 billion for the development of pilot projects. Moreover, as per India smart grid organization the government of India under the Smart City program has targeted 99 cities for upgradation to being smart. However, low durability impedes the growth of the market over the forecast period of 2020-2027. Although, the surging trend in construction of provincial and national highways for infrastructural development of the region creates a potential market growth opportunity.

The regional analysis of global Asphalt market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-pacific is the leading/significant region across the world in terms of market share owing to the growing construction activities in the region and rising infrastructure development projects. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising disposable income, rising urbanization and increasing investments in construction activities would create lucrative growth prospects for the Asphalt market across Asia-Pacific region.
