Abstracts

Global Asset-Based Lending Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Asset-Based Lending refers to a loan provided by banks and NBFCs and it is secured by collateral security such as commercial property, stocks and so on. In case of default in paying loans, the bank can seize the mortgaged collateral to cover the loan and interest value. As compared to unsecured loans these types of loans have low rates of interest. Banks provide asset-based lending in two formats such as fixed interest rate based and floating interest rate. In a Fixed rate loan, the rate of interest rate remains the same during the entire loan tenure. Whereas, in the Floating rate the interest rate changes as per the rate changed by the central bank of the country or region from which the bank belongs. The growing Financial Services sector worldwide and easy availability of loans as well as strategic initiatives from leading market players are key factors accelerating the market growth.

According to Statista – as of 2022, the revenue in Banking, Finance & Insurances worldwide is estimated at USD 3720 billion, and the market is projected to grow at an annual growth rate of 2.47% between 2022 and 2025 to reach USD 4000 billion by end of 2025. Also, the rising emergence of Lending-as-a-service (LaaS) platforms and the growing Banking & finance sector in emerging regions would create lucrative growth prospects for the market over the market period. However, the rising concern over Non-Performing Assets (NPA) stifles market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Asset-Based Lending Market study includes Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region in terms of market share owing to the presence of leading financial institutions as well as the increasing adoption of assets-based loans from business organizations in the region. Whereas the Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as the rising expansion of the financial services sector as well as increasing penetration of digital lending platforms in the region.
