Authentication and brand protection is the method that facilitates the right holder undertakes to prevent third parties from using its intellectual property without permission. Authentication and brand protection are gaining huge traction among industries such as electronics, pharmaceuticals, automotive, food & beverages, apparel, luxury goods, cosmetics, and many others. The rising emphasis on protecting product and brand integrity, the emergence of track & trace technologies, stringent anti-counterfeiting laws and regulations enforced by governments, coupled with the growth of the manufacturing industry is the primary factors for the global market growth. For instance, according to the India Brand Equity Foundation (IBEF), in 2019, it is estimated that the manufacturing sector was around USD 395.89 billion in India, and the amount

increased and reached USD 694.93 billion in the first quarter of 2022. Consequently, the flourishing growth of the manufacturing industry is anticipated to propel the demand for authentication and brand protection, thus it drives market growth across the globe. However, the high initial capital investment required and limitations of existing technologies impede the growth of the market over the forecast period of 2022-2028. Also, growing demand from emerging economies in APAC and the development of remote authentication solutions are anticipated to act as a catalyzing factor for the market demand during the forecast period.
