Abstracts

Global Autoimmune Hemolytic Anemia Therapeutics Market is valued approximately USD XXX million in 2019 and is anticipated to grow with a healthy growth rate of more than 6.14 % over the forecast period 2020-2027. Immune hemolytic anaemia (IHA) is another name for autoimmune hemolytic anaemia (AHA) which is a rare immune red blood cell disease. As the immune system produces antibodies that target the body's red blood cells, autoimmune hemolytic anaemia develops, caused by a reduction in the amount of red blood cells. The rising number of cases of blood disorders around the world is one of the major factors driving demand for autoimmune hemolytic anemia therapeutics. According to Statista, the most common forms of bleeding disorders are haemophilia A and B, as well as von Willebrand disease. In 2018, 210,454 people were diagnosed with haemophilia and 78,500 people were diagnosed with von Willebrand disease around the world. In addition, it is estimated that more than 13,600 people in the United States were diagnosed with haemophilia A in 2018, while only 4,100 were diagnosed with haemophilia B. Additionally, increased use of drugs like corticosteroids for patients with autoimmune hemolytic anaemia is driving the global autoimmune hemolytic anaemia therapeutics sector. To avoid risks such as osteoporosis, diabetes, obesity, and uncontrolled hypertension, corticosteroids are strongly recommended. Also, the global autoimmune hemolytic anaemia therapeutics market is anticipated to be driven by an increase in demand for the production of combination therapies and

anaemia therapeutics in patient assistance programmes. However, treatment costs are a major factor influencing the choice of therapy. Bone marrow transplantation costs are over USD 300,000. Thus, high treatment costs are likely to hamper the growth of the market for autoimmune hemolytic anemia therapeutics treatment.

The regional analysis of global Autoimmune Hemolytic Anemia Therapeutics market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the high prevalence rate of blood disorder. Whereas Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2020-2027. Factors such as increase in awareness about autoimmune hemolytic anemia therapeutics and blood disorders would create lucrative growth prospects for the Autoimmune Hemolytic Anemia Therapeutics market across Asia-Pacific region.
