The rising investments in healthcare R&D activities, growing incidences of autoimmune diseases, increasing availability of several alternative treatments are the primary factors for the market growth across the globe. In addition, the emergence of novel technologies in healthcare devices, as well as rising government funding are the further factors that may surge the market demand globally. For instance, according to the India Brand Equity Foundation (IBEF), in India there were nearly USD 20.95 billion expenditure was accounted on the pharma sector in 2011 which is projected to reach USD 55 billion by 2020. Thereby, rising spending on the pharma industry is also augmenting the market growth. However, low medical insurance coverage for autoimmune diseases impedes the growth of the market over the forecast period of 2022-2028. Also, advancements in diagnostic methods are anticipated to act as a catalyzing factor for the market demand during the forecast period.

The key regions considered for the global Autoimmune Treatment market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World.
